## Trouble in Milford Sounds

A large cruise ship visiting the sounds had a fire in the engine room, crippling this big beast. Local ships are getting passengers off the stricken liner bringing them ashore. The decision has been to fly passengers out of there, we have managed to get the job. Also the jobs of getting parts down there and specialist to fix this unforeseen incident.

### Flight Plan

First Job, passengers from Milford to Queenstown.

Small Aircraft from Queenstown to Milford, pick up passengers and return to Queenstown. Repeat for entire flight.

Second Job, Passengers From Queenstown to Christchurch.

Mid Sized Passenger Jet, from Auckland to Christchurch. Then divert to Queenstown for passengers back to Christchurch, Repeat Queenstown Christchurch run for rest of flight.

Third Job, Parts and manpower.

The Navy have spare parts which will be needed, they also have a team of guys ready to go to help get this liner back into operation. They will need to be picked up from WHENUAPAI and flown down, supplies from Christchurch picked up and flown back to Queenstown.

Please let me know what job you would like to do, e-mail me with your choice.
