Copperhead Road - Moonshine Hauling

I was listening to Copperhead Road, by Steve Earle when I got this idea. So it isn't hard to come up with an OLF idea!!! So moonshine is being made up in the hills and being carted down into the cities, moonshiners are looking for any way to get there booze down to Knoxville. The Police are really getting smart with following cars and are really hitting it hard. Several families have been putting there money away and brought some airplanes, and now are looking for some spirited flyboys who aren't afraid of the cops to do a run picking up "Shine" from several grass strips along the way....

Aircraft and Flight Plan

Early Twin Prop, DC-3 will be the biggest!! But Dove, Beech 18d etc... If in doubt ask

WV30 - WV10 - VA11 - 17TN - TN11 - KDKX

Due to these being small strips, there are no nav-aids for this flight.
So fly direct to each strip, check before flight for runway headings.
